Pro Product Short Description	Shut Down Damage Due to Excess Condensation with a WiFi Water Sensor Help protect your customers' HVAC equipment and homes with the L2 WiFi Water Sensor and Switch. The L2 is an integral part of a whole home water damage protection system, helping to protect against damage due to excess condensation produced by HVAC equipment.
Pro Product Detail Page Title	L2 WiFi Water Sensor and Switch
Pro Product Breadcrumb Name	L2 WiFi Water Sensor and Switch
Pro Product Web Overview	Water Damage Can Happen to Anyone The L2 Sensor and Switch gives customers added peace of mind and water damage protection from condensate overflow. The compact device can be wired directly to the furnace, air conditioner, dehumidifier, or other HVAC equipment. If water overflows the condensation pan or is sensed by the cable, the sensor and switch can turn the machine off or on and send an alert to the homeowner. The L2 takes the guesswork out of locating the source of the condensation overflow and automatically stops it. - Advanced leak awareness: Alerts to condensation and overflow from HVAC and other 24-volt equipment with smartphone notifications, plus alerts on-site with LED lights and a 100 dBA alarm. - Quick setup: The device is wired directly to HVAC and other 24-volt equipment and switches it on or off when excess condensation is detected via dry contacts - no batteries to change. - Versatile: Can be wired to HVAC equipment with or without a condensate pan or pump and can be installed vertically or horizontally. Works with any 24-volt equipment (air handler, boilers, heat pumps, furnace, etc.) - Meaningful alerts: The switch is triggered and customers are notified within seconds of detected excess condensate, taking the guess work out of identifying the source and location of the issue. Monitor temperature and humidity spikes outside of the user set range via the app.
LOB	Water
Ambient Relative Humidity (Max)	95% non-condensing
Ambient Relative Humidity (Min)	5% non-condensing
Reusable	Yes

Attribute	Value
Works With Resideo App	Yes
Works With Resideo App Description	The Resideo App supports the L2 WiFi Water Leak and Freeze Detector, so homeowners can stay aware of alerts and activities all from their Resideo App.
Works With Resideo Applications	Resideo App
Compatible Third Party App	No
