Master Bullets - Trade	<p>Package includes two #4978 Electrode Wires for inside AprilAire 800 Series steam humidifiers Inspect electrodes yearly and replace them at minimum every three years (or more often if the wires become loose or damaged) The electrode wires provide electrical current to the water in the steam canister, heating it to a boil and creating steam that is distributed through the home Refer to Maintenance Manuals for the Model 800 Series Steam humidifiers for detailed instructions on all replacement parts</p>
Master Long Description - Trade	<p>AprilAire genuine replacement part for AprilAire Steam Humidifier Models 800, 801, 865, and 866. Two wires per package. The AprilAire steam humidifier electrode wires provide electrical current to the water in the steam canister, heating it to a boil and creating steam that is distributed through your home. To maintain peak performance and the continued safe operation of your AprilAire Steam Humidifier, the electrode wires should be replaced every three years. Remember to inspect the wires annually; they can be replaced sooner if loose or damaged. AprilAire invented whole-home humidification and continues to lead the industry. Since launching the first humidifier in 1954, AprilAire has built a comprehensive product offering – all designed to create healthy air in your home. AprilAire Humidifiers keep the relative humidity in your home within a healthy range. Your home will feel more comfortable and items in your home susceptible to damage from low humidity, such as wood flooring, will be better preserved.</p>
