

HEAT PUMP PAD 36 IN. X36 IN. X8 IN.

Item#: **HP3636-8**

The Heat Pump Pad™ **HP3636-8** is a 36x36x8 in. base pad for heat pumps installed in snowy climates. Rather than the typical combination of an equipment pad and 6 in. heat pump risers, the Heat Pump Pad provides a full 8 in. of elevation in a square footprint. The star pattern of the integral risers allows for installation of equipment with different size footprints up to 36 in. X 36 in. Risers are molded into the pad to form a solid single piece base.

Product Features & Benefits

- Single piece construction is stronger and faster to install than typical combination of equipment pad and 6 in. heat pump risers
- Innovative star pattern of integral risers allows for installation of equipment with different size footprints up to 36 in. X 36 in.
- Heat Pump Pad™ kit includes eight anti-vibration pads custom made to fit into the guide slots on the top of the integral risers and can be adjusted to equipment footprint
- The base is sloped outward to allow for easy drainage of condensate or defrost cycle condensate when the outdoor coil is operating in heat pump mode
- The nestable feature of the Heat Pump Pad™ makes for efficient shipping, transportation, and warehousing.
- Environmentally friendly, molded from recycled polypropylene material
- Unaffected by UV exposure or extreme weather
- Drillable making it easy to secure equipment to the pad if necessary
- Made in the USA

Specifications ▲

Color	Gray
Application	Condensers Heat Pump
Drillable	Yes
Load Capacity	389 lb.
Nestable	Yes
Rating	UV Resistant
Shape	Square
Texture	Subtle
Product Length	36 in.
Product Width	36 in.
Ducted or Ductless	Ducted
Product Height	8 in.

Order Info ▲

UPC	0095247087068
Primary UoM	Each

Primary Depth (inches)	36
Primary Width (inches)	36
Primary Height (inches)	8
Primary Weight (lbs)	18
Quick Ship Flag	No
Order Multiple	16
