TECHNICAL SERVICE BULLETIN

TSB C-GN-OT-0075

Date: June 2, 2025

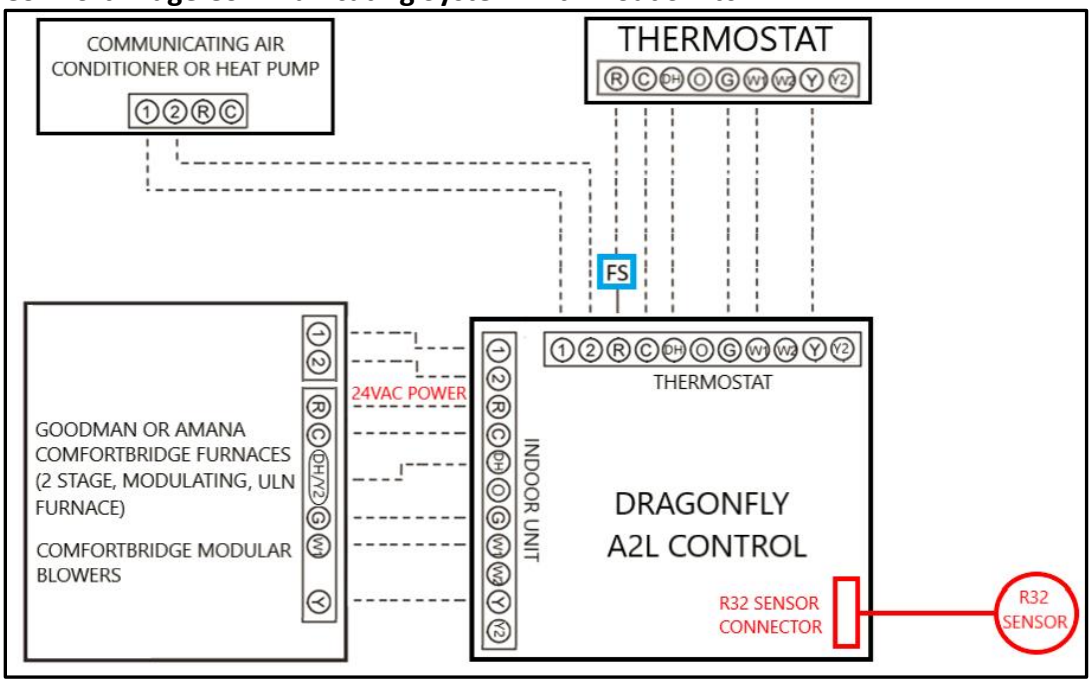

To: All Service and Parts Managers

From: Technical Services Department

Subject: **Furnace Integration Kit with Float Switch Wiring Improvement**

This is an important Technical Service Bulletin to be carried out by trained and certified service technicians. The intent of this bulletin is to inform our customers of the proper method to wire in the drain float switch with the Non-A2L Furnace Integration Kit, for all possible installations. The diagrams will streamline the wiring, help minimize confusion and improve the installation process, while maintaining reliability, performance, and efficiency. This is a requirement when utilizing a float switch to ensure A2L mitigation mode is functional in the event of a float switch alarm. Please locate your system match below and wire in the float switch according to the wiring diagram provided.
