

MSTN

Source column: Item Number

Attribute	Value
Brand	Honeywell Home
Product Taxonomy Node	RMH Root.Dampers.Damper Parts
Pro Product Short Description	The MSTN is a uni-directional motor that requires single-pole, double-throw switching to drive the damper open and closed. It uses a wafer switch to power the synchronous motor for only 30 seconds while the motor is moving between open and closed or vice-versa. When the motor reaches the open or closed position, the internal switches cut off the power to the motor.
Pro Product Detail Page Title	Motor Switch Terminal
Pro Product Breadcrumb Name	Motor Switch Terminal
LOB	Comfort
Works With Resideo App	No
Compatible Third Party App	No
